Cathedrals and Brick Walls: Creating Your Future

Quick Look: Weekend program (6:00 PM Friday - 3:00 PM Sunday) / \$375.00

OVERVIEW

The technologies and discoveries of the human potential movement have consistently stated that we are responsible for our experiences and outcomes in our lives. Unawareness of our original thoughts, beliefs, and needs creates unintended outcomes, and in many cases, they become difficult barriers to resolve. Operating out of scarcity, never feeling enough, having enough, being enough, we struggle daily to make ends meet emotionally, mentally, and financially. What we see out there in the world is a true and accurate reflection of what we see inside of ourselves. Unfortunately, we often remain unaware of the relationship between our thinking and our doing.

Cathedrals and Brick Walls is a powerful workshop that provides you with the behavioral technology and opportunity to transform your founding thoughts that have created your life as you experience it now. Careful attention is given to the development of thought, what you truly desire, and the barriers that block your way.

Understanding some of the principles that make up the creative process is invaluable in creating your future. Continuing to use the same "manual" again that created the problem for you in the first place is not going to get you where you want to go. Ultimately, this involves increasing your understanding of the spiritual laws that govern our world of cause and effect.

We perceive thought as the most creative aspect of living, for from your mental machinery arises your experience of life and the outcomes created by those thoughts. This workshop gives you the opportunity to clarify that process and begin to create the peace, satisfaction, joy, love, and celebration you desire.

Discovery Model

The discovery model used in this program is the "Integrity in Life" model, based upon the work of Ron Smotherman.
